Course 6 - Vocabulary

1. The list of the words is below.
2. Don't forget to read the vocabulary tips.
3. You can download the audios of the words with the link at the bottom of the post.

Vocabulary Tip:

Knight did one dictionary research in 1994 and realized that learners who had high verbal abilities used a guessing method. Conversely, learners with low verbal abilities used more dictionary. Also, high verbal ability students looked up the dictionary even if they knew the meaning. So far, it is interesting. Finally, it is concluded that using both the dictionary and a guessing technique is the best. And learners who equally do that are the learners that will remember more the words after 15 days.

Proven methods:

1. Practicing words out loud is proven to be the most effective method. Adding drama and emotion to the words/pronunciation makes you remember the word for a longer period of time.

2. Spare some time to memorize but make it short and intense with emotion and drama. Do not spend too much time memorizing the words. 15 to 20 minutes is ideal.

3. Also, writing meaningful sentences with your new words keeps your vocabulary alive.
